

## Notes on New Contributors

### **Bridget McGill**

Bridget McGill is a professional archaeologist working for McGill Archaeological Consultants of Edinburgh. The pipeline survey was carried out on behalf of Entrepose-Laing JV, the construction contractors for Seabank Power Ltd.

### **James Fussell**

James Fussell is a geologist, analytical chemist and Chartered Engineer with experience in metal and coal exploration and mining and in geotechnical engineering. He is Bristol born, bred and educated, gaining his degrees at the University of Bristol. He runs a consultancy in geology, mining and industrial history and environmental matters and is also involved in satellite remote sensing imagery.

### **Simon Cox**

Simon Cox graduated in Archaeology and Ancient History from the University of Wales in 1993. In 1996 he returned to Bristol and secured a post as an Archaeological Project Supervisor with Bristol and Region Archaeological Services (BaRAS).

Much of his recent work has focussed on the Medieval and later waterfront in Bristol, together with extensive involvement in the recording of the Medieval and Civil War defences (the Portwall) at Temple Quay.

He is currently working on joint publication of two excavations on a medieval dye-works and tenements at the southern end of Redcliff Street, Bristol.
